Summary

Full Stack Web Developer with experience in building and deploying Secure Full-Stack applications using React.js, Node.js, Express, and MongoDB. Proficient in creating responsive UIs, developing REST APIs, and managing authentication and state. Seeking to contribute web development expertise in building modern, scalable digital products.

Experience

GPT SOFTWARE Pvt. Ltd.

Full Stack Developer Intern

January 2025 - May 2025

- Implemented a new component library using React.js and Storybook, which improved UI consistency scores by 60% and accelerated the onboarding of junior developers for the team.
- Implemented efficient state management and API integrations, reducing frontend bugs and improving performance metrics by 30%.
- Partnered with designers and backend engineers to maintain UI consistency and ensure smooth data flow throughout the application.

Projects

Crypto Dashboard

AlmaBetter Verified Project – MERN Stack

🔗 <https://crypto-dashboard-6.onrender.com/>

Sep 2025

Engineered and maintained both frontend and backend components of a Cryptocurrency Dashboard, enhancing system reliability and ensuring smooth integration across modules.

- Developed and integrated RESTful APIs to fetch real-time cryptocurrency data, reducing data retrieval latency by 25% and improving overall application responsiveness.
- **Developed** interactive data visualizations and charts for cryptocurrencies, enabling users to **analyze** trends and make informed decisions efficiently.
- Collaborated with mentors and peers in an agile environment, accelerating feature delivery by 20% while maintaining clean, maintainable code standards.

React, Node.js, MongoDB, Tailwind CSS, Redux Toolkit, Express.js, HTML, CSS, RESTful API, git, Render

Entertainment App - Movies & Series Explorer

🔗 <https://movie-search-2-kgke.onrender.com/>

Aug 2025

- Developed a full-stack Movie Search application with React.js frontend and Node.js/Express backend, enabling users to search and filter movies efficiently.
- Designed and implemented a database system to manually store and manage movie entries, reducing data retrieval latency by 30% and ensuring accurate, up-to-date content.
- **Engineered** a database system to manually store and manage movie entries, **reducing** data retrieval latency by 30% and **ensuring** accurate, up-to-date content.
- Designed responsive UI components and interactive elements, ensuring seamless usability across desktop and mobile devices.
- Collaborated in an agile workflow with peers, accelerating feature delivery while maintaining clean, modular, and maintainable code.
